Informatica Intelligent Data Platform Delivers Industry's First Metadata-Driven Artificial Intelligence to Power Data-Driven Digital Transformation

Informatica Intelligent Data Platform Delivers Industry's

Advances in Wireless Communications and Networks (AWCN) is a peer reviewed open access online international journal covers Communications, Wireless Communication topics including cellular communications, LTE, 4G and 5G, satellite communications, wireless communication networks, social networks, delay tolerant networks, wireless sensor networks, vehicular networks, smart antennas, beamforming ...

Advances in Wireless Communications and Networks

Engineering Letters . SOME OF THE COMING SPECIAL ISSUES OF JOURNAL ENGINEERING LETTERS . The Engineering Letters have planned the special issues for revised and extended version of the selected papers from the following conferences:

Welcome to Engineering Letters (IAENG)

International Journal of Intelligent Information Systems (IJIS) provides a forum wherein academics, researchers and practitioners may publish high-quality, original and state-of-the-art papers describing theoretical aspects, systems architectures, analysis and design tools and techniques, and implementation experiences in intelligent information systems.

International Journal of Intelligent Information Systems

Research synopsis (projects)Our research advances how machines can learn, predict or control, and do so at scale in an efficient, principled, and interpretable manner.

Tommi Jaakkola - Massachusetts Institute of Technology

An intelligent transportation system (ITS) is an advanced application which, without embodying intelligence as such, aims to provide innovative services relating to different modes of transport and traffic management and enable users to be better informed and make safer, more coordinated, and 'smarter' use of transport networks.. Although ITS may refer to all modes of transport, the directive ...

Intelligent transportation system - Wikipedia

Advances in artificial intelligence and signal processing are driving the growth of the artificial intelligence market as improved appropriate technologies is critical to offer enhanced drones, self-driving cars, robotics, etc.

IDC 1414_v3 IDC I V I E W THE DIGITAL UNIVERSE IN 2020: Big Data, Bigger Digital Shadows, and Biggest Growth in the Far East December 2012 By John Gantz and David Reinsel

IDC I V I E W THE DIGITAL UNIVERSE IN 2020: Big Data

Cloud computing is the on demand availability of computer system resources, especially data storage and computing power, without direct active management by the user.The term is generally used to describe data centers available to many users over the Internet.Large clouds, predominant today, often have functions distributed over multiple locations from central servers.

Recent Advances in Electrical & Electronic Engineering

Introduction When the EU General Data Protection Regulation (GDPR) was finally agreed in April 2016, it seemed a long time until it would apply.

Preparing for the General Data - Allen & Overy

Deep Learning for Medical Image Processing: Overview, Challenges and Future Muhammad Imran Razzak, Saeeda Naz and Ahmad Zaib Abstract : Healthcare sector is totally different from other industry.

Deep Learning for Medical Image Processing: Overview

The Intelligent Transportation Society of America advances the research and deployment of intelligent transportation technologies to save lives, improve mobility, promote sustainability, and increase efficiency and productivity.

ITS America

A concise and self-contained introduction to causal inference, increasingly important in data science and machine learning. The mathematization of causality is a relatively recent development, and has become increasingly important in data science and machine learning. This book offers a self-contained and concise introduction to causal models and how to learn them from data.

Elements of Causal Inference | The MIT Press

The International Journal of Intelligent Robotics and Applications (IJIRA) fosters the dissemination of new discoveries and novel technologies that advance developments in robotics and their broad applications.
