Agile Test Planning with the Agile Testing Quadrants

Planning poker, also called Scrum poker, is a consensus-based, gamified technique for estimating, mostly used to estimate effort or relative size of development goals in software development. In planning poker, members of the group make estimates by playing numbered cards face-down to the table, instead of speaking them aloud.

Planning poker - Wikipedia

- Agile Projects are adaptive and fast moving. To be successful with Agile, you need to follow some simple planning steps to keep the project on track. There are only a few simple practices, but it's important to understand these practices and follow them correctly. We'll start this course by introducing the Agile Sprints.

The Planning Game [PDF] – printable reference.. Purpose: estimate the effort for User Stories (Product Backlog Items, Value Drivers) Prerequisites: all items have a value estimate, each item is written on a separate note card, full team membership is known and available for planning, each team member has a set of planning game cards:

The Planning Game - An Estimation Method for Agile Teams

A well-established best practice is that those who will do the work, should estimate the work, rather than having an entirely separate group estimate the work. But when an agile team estimates product backlog items, the team doesn't yet know who will work on each item.

Planning Poker - Mountain Goat Software

The more focused and frequent lessons learned meetings are, the more valuable they will be. Retrospectives are an agile technique that any team can use to identify opportunities for improvement in their processes, team dynamics, and decision-making as well as areas for continued excellence.

The bus factor is a measurement of the risk resulting from information and capabilities not being shared among team members, from the phrase "in case they get hit by a bus". It is also known as the bread truck scenario, lottery factor, truck factor, bus/truck number, or lorry factor.. The concept is similar to the much older idea of key person risk, but considers the consequences of losing key ...
