

HUMAN REPRODUCTIVE BIOLOGY FOURTH EDITION

human reproductive biology fourth pdf

Cloning is the process of producing genetically identical individuals of an organism either naturally or artificially. In nature, many organisms produce clones through asexual reproduction. Cloning in biotechnology refers to the process of creating clones of organisms or copies of cells or DNA fragments (molecular cloning). Beyond biology, the term refers to the production of multiple copies of ...

1. Introduction. Bisphenol A (BPA) is a monomer that was first developed as a synthetic estrogen in the 1890s and was reported to have the efficacy of estrone in stimulating the female reproductive system in rats in the 1930s. Subsequently, BPA has been used in many consumer products, including plastics (as a polymer, i.e. polycarbonate [#7] plastic), PVC, food packaging, dental sealants, and ...
