In statistics, the Breusch–Pagan test, developed in 1979 by Trevor Breusch and Adrian Pagan, is used to test for heteroskedasticity in a linear regression model. It was independently suggested with some extension by R. Dennis Cook and Sanford Weisberg in 1983. It tests whether the variance of the errors from a regression is dependent on the values of the independent variables.

Economic methodology is the study of methods, especially the scientific method, in relation to economics, including principles underlying economic reasoning. In contemporary English, 'methodology' may reference theoretical or systematic aspects of a method (or several methods). Philosophy and economics also takes up methodology at the intersection of the two subjects.

1. Introduction. By 2050, agricultural production will need to increase substantially to feed growing and urbanising populations, particularly in sub-Saharan Africa (SSA) and South Asia. Estimates of the increase needed vary between 25 and 70%, depending on the assumptions made about efficiency and consumption pattern changes (Alexandratos and Bruinsma, 2012; Hunter et al., 2017).
