Marine biology is the scientific study of marine life, organisms in the sea. Given that in biology many phyla, families and genera have some species that live in the sea and others that live on land, marine biology classifies species based on the environment rather than on taxonomy. A large proportion of all life on Earth lives in the ocean. The exact size of this large proportion is unknown ...

This chapter introduces the idea of distributive justice. It identifies several different views of what characterizes distributive justice, as opposed to other types of justice and to non-justice-based moral demands. The preconditions of distributive justice, its primary subject and its object, and its normative significance are discussed. The chapter then suggests that bringing the diversity ...
