INTERNATIONAL STANDARD 1302 - teipir.gr

Specifies the rules for comparison of the measured values with the tolerance limits for surface texture parameters defined in ISO 4287, ISO 12085, ISO 13565-2 and ISO 13565-3.

Geometrical Product Specifications (GPS) -- Surface - ISO

2 ROUGHNESS MEASUREMENTS OF STAINLESS STEEL SURFACES can be performed quickly and easily using the simplified procedure for roughness inspection given in Annex A, EN ISO 4288 [5], [6].

SURFACE ROUGHNESS TESTING EQUIPMENT SR SERIES - Starrett

Waviness is the measurement of the more widely spaced component of surface texture. It is a broader view of roughness because it is more strictly defined as "the irregularities whose spacing is greater than the roughness sampling length". It can occur from machine or work deflections, chatter, residual stress, vibrations, or heat treatment. Waviness should also be distinguished from flatness ...

6. Document Types. This specification defines two kinds of documents -- OPDS Catalog Feed Documents and OPDS Catalog Entry Documents. An OPDS Catalog Feed Document is a refinement of an "atom:feed" from the Atom Syndication Format [RFC4287].. An OPDS Catalog Entry Document is a refinement of an "atom:entry" from the Atom Syndication Format [RFC4287].. The namespace name [REC-xml-names] for ...

where C p is the specific heat capacity per unit volume, v is the phonon velocity, and l is the phonon mean free path. For most polymers, l is extremely small due to scattering with other phonons, defects, and grain boundaries. Therefore, most polymers have a low TC in the range of 0.1–0.5 W/(m K), which is not sufficient for many applications that require high heat conduction .
