LC-LCD | Grundfos

The Grundfos LC/LCD range of level controllers comprises three series with a total of six versions: The LC/LCD 107 level controllers, operated by level bells; The LC/LCD 108 level controllers, operated by float switches; The LC/LCD 110 level controllers, operated by electrodes. All are excellent for use with direct on-line start motors up to 11 KW.

LC-LCD level controller - for wastewater pumping stations

LCD 107 The LCD 107 level controller is almost identical to the LC 107. The main difference is that the LCD 107 is designed as a two-pump controller using three level bells. The LCD 107 also ensures that the total operating hours are evenly distributed between the two pumps by means of an automatic alternation function.
