An inverter compressor is a gas compressor that is operated with an inverter.. In the hermetic type, it can either be a scroll or reciprocating compressor.This type of compressor uses a drive to control the compressor motor speed to modulate cooling capacity. Capacity modulation is a way to match cooling capacity to cooling demand to application requirements.

An overhead valve engine (OHV engine), or "pushrod engine", is a reciprocating piston engine whose poppet valves are sited in the cylinder head. An OHV engine's valvetrain operates its valves via a camshaft within the cylinder block, cam followers (or "tappets"), pushrods, and rocker arms.. The OHV engine was an advance over the older flathead engine, whose valves were sited within the cylinder ...
