Socio-economic Status Factors Effecting the Students

More than three decades ago, Cohen (1981) conducted the first meta-analysis of multisection studies and reported that SET ratings correlate with student learning with $r = .43$, a small-to-moderate correlation. Cohen wrote: "The results of the meta-analysis provide strong support for the validity of student ratings as a measure of teaching effectiveness" (p. 281) and "... we can safely say ...

What is Feature Selection. Feature selection is also called variable selection or attribute selection. It is the automatic selection of attributes in your data (such as columns in tabular data) that are most relevant to the predictive modeling problem you are working on.

An Introduction to Feature Selection

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.
