- Hi. I'm Simon Allardice, and welcome to Foundations of Programming: Object-Oriented Design. This course exists because everyone who learns to program hits the same wall. First, you get through the fundamentals, the basic syntax of a programming language. You learn how to write some code. But soon you realize there's a huge difference between being able to write a few lines of code, and ...

Become a Programmer, Motherfucker. If you don't know how to code, then you can learn even if you think you can't. Thousands of people have learned programming from these fine books:

## **Become a Programmer, Motherfucker**

In computer science, imperative programming is a programming paradigm that uses statements that change a program's state. In much the same way that the imperative mood in natural languages expresses commands, an imperative program consists of commands for the computer to perform. Imperative programming focuses on describing how a program operates.. The term is often used in contrast to ...

## **Imperative programming - Wikipedia**

In computer science, functional programming is a programming paradigm—a style of building the structure and elements of computer programs—that treats computation as the evaluation of mathematical functions and avoids changing-state and mutable data. It is a declarative programming paradigm, which means programming is done with expressions or declarations instead of statements.
